

to the chairman, and the other commissioners: I have read some of your remarks, I have heard from the interest of corporate media, the comments from both sources are very alarming to people like me. If you were to ask almost any protester that is for peace "I have talked to many" you will find that all believe the media has failed to act in the public's interest. The media is acting in the interest of corporate ownership, The media has become a tool of propaganda "who's best interest is being served"? There is not diverse opinions now during the time of war nor has there been before this war. Uncontrolled consolidated corporate media will only serve the interest of media ownership, not the voice of democracy.

P.S. If you were able to ask Mr Jefferson what his opinion on the state of media, he most likely would reply with a comment with this content. We had the foresight to design a bill of rights, it is very unfortunate the federalist would not allow the inclusion of protections against corporate powers especially that of CORPORATE MEDIA. I'll leave you with a quote that I have heard everywhere from the FCC to Nazi controlled Germany. "If you can control what people know then you can control how people act". To many of us it sounds like daily life. If you like you can call me 360 647 3595, I'm not getting paid to do this but corporate media gets paid to contact you. Thanks rus geh
